## College of Career Planning

"Failure to plan is a plan to fail"

A successful research career hinges not only on getting that single paper published, it requires you to think ahead about where you want to be 3 to 5 years from now, or even 10 to 15 years. You need to know where to find the funding to keep you going, so that when new opportunities present themselves, you are ready to take the next step.

Starting your career

Starting your career

- How to chart a successful research career
- Setting sail on your research journey

SHARE THIS:     

## College of Recommended Organizations

Supporting researchers is a team effort and Elsevier regularly discusses key concerns with global organizations.

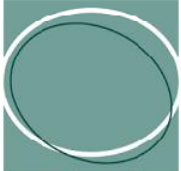

Many organizations exist around the world that are dedicated to supporting the careers and progress of researchers today. Whether it be from a policy level, creating training resources, providing a voice and advice or organizing events - these organizations work tirelessly to improve the future of researchers in academia. Listed below are just a handful of recommended organizations we would like to highlight.

**vitae**  
realising  
the potential  
of researchers

Vitae is dedicated to realizing the potential of researchers through transforming their professional and career development. Working to meet society's need for high-level skills and innovation.

## College of Networking

Building and maintaining a network within your research community

Researching and writing can absorb a huge amount of time. It is easy to forget that engaging with the world around you is just as important when it comes to establishing a successful career and becoming a widely-recognized researcher.

Staying on top of developments within your subject area will not only benefit your career, it might give you new insights into the topic you've been working on, put you in contact with the experts in your field and put you on the right track to getting the recognition you deserve.
